NSF: Improving Undergraduate STEM Education: Education and Human Resources (IUSE: HER) Program

The Undergraduate STEM Education program has updated their information with new deadlines beginning in November 2015. Please take a look at the program and see if this is something you would be interested in pursuing. Program information is attached to the email and the link is provided below.

Brief Synopsis

“The Improving Undergraduate STEM Education (IUSE: EHR) program invites proposals that address immediate challenges and opportunities that are facing undergraduate STEM education, as well as those that anticipate new structures (e.g. organizational changes, new methods for certification or credentialing, course re-conception, cyberlearning, etc.) and new functions of the undergraduate learning and teaching enterprise. The IUSE: EHR program recognizes and respects the variety of discipline-specific challenges and opportunities facing STEM faculty as they strive to incorporate results from educational research into classroom practice and work with education research colleagues and social science learning scholars to advance our understanding of effective teaching and learning.”
