Interactive Reporting - Strange Symbol Appears on Screen

When using two or more monitors with Interactive Reporting, you may encounter strange errors or behavior.

To avoid these situations, **Interactive Reporting should be used in the Primary monitor only**. To determine and configure your primary monitor, please see the following Microsoft support article: [Change display settings on multiple monitors](https://support.microsoft.com/en-us/help/4030799/change-display-settings-on-multiple-monitors)

An example bug/artifact that may appear when using Interactive Reporting in a secondary monitor is shown here:
