

Statement of Work

- Finish and publish the pilot paper
- Continue to apply for grants for this project
- Work on all aspects of a larger project for seizure prediction. This includes but is not limited to
 - Obtaining the data from our data base, including clipping and de-identifying files
 - Establishing a database for focal seizures, with the goal of having 400 seizures on the database
 - Assisting on the IRB application
 - Working on the current technique for seizure prediction as well as developing novel techniques
- A larger paper with more seizures analyzed
