

Master of Engineering Electrical Engineering With a Concentration in Microelectronics

Spring 2007 Campus Cohort Schedule

Spring 2007	ECSE 6960 Light Emitting Diodes
	<i>Breadth Elective</i>
Fall 2007	ECSE 4720 Solid State Physics
	ECSE 4080 Semiconductor Power Electronics
Spring 2008	ECSE 6270 Optoelectronics
	MTLE 4160 Semi conducting Materials (free elective could be substituted with Advisor pre-approval)
Fall 2008	ECSE 6960 Physical Foundations of Solid State Devices
	ECSE 6230 Semiconductor Devices and Models I
Spring 2009	<i>Breadth Elective</i>
	ECSE 6290 Semiconductor Devices and Models II

Core Courses; Electives; Breadth Electives (15 credits must be from the ECSE Department and 6 credits should be technically related)

Please note that you can take your breadth electives at any point
