

Directions to Nuclear Engineering Science (NES) Building

From I-787 North, take Exit to Route 7 East, Troy-Bennington. After passing the Hudson River and entering Rt. 7, Hoosick Street for about one mile, turn right onto S. Lake Ave. On the third intersection, turn right onto Tibbits Ave. The NES Building is a two-story brick building on the right hand side of the road next to a huge blue water tower.

Coming from RPI main campus, you can take Peoples Ave passing the Houston Field and then turn right on to Sunset Terrance and then turn left onto Tibbits Ave. Or you can take the free shuttle bus in front of the Student Union and get off at the NES Building.

Once inside the NES Building, you will find the Seminar Room and faculty/staff offices on the first level and the student offices and the Radiological Engineering Laboratory on the ground level.
